## Haverford Problem Solving Group November 3, 2021

**Problem 3.** Find the 2000<sup>th</sup> digit in the square root of N = 11...1, where N contains 1998 digits, all of them 1's.

**Problem 6.** Can the portion of any parabola inside a circle of radius 1 have a length greater than 4?

**Problem 10.** Suppose that a polygon has integer coordinates for all of its vertices. Let i be the number of integer points that are interior to the polygon, and let b be the number of integer points on its boundary (including vertices as well as points along the sides of the polygon). Then the area of this polygon is

$$i + \frac{b}{2} - 1.$$

**Problem 11.** Determine whether there exist non-constant polynomials P(x) and Q(x) with real coefficients satisfying

$$P(x)^{10} + P(x)^{9} = Q(x)^{21} + Q(x)^{20}$$
.

**Problem 12.** Ann and Bob play a game on an infinite checkered plane making moves in turn. A move consists in orienting any unit grid-segment that has not been oriented before. If at some stage some oriented segments form an oriented cycle, Bob wins.

- (a) Bob makes the first move. Does Bob have a strategy that guarantees him to win?
- (b) Ann makes the first move. Does Bob have a strategy that guarantees him to win?

**Problem 14.** Suppose that f is a function on the interval [1,3] such that  $-1 \le f(x) \le 1$  for all x and  $\int_1^3 f(x) dx = 0$ . How large can  $\int_1^3 \frac{f(x)}{x} dx$  be?

**Problem 15.** Let  $a_0 = 5/2$  and  $a_k = a_{k-1}^2 - 2$  for  $k \ge 1$ . Compute

$$\prod_{k=0}^{\infty} \left( 1 - \frac{1}{a_k} \right)$$

in closed form.

If you are not in our Discord server, you should definitely join. We will post there handouts, resources, solutions, room/time changes, and (most important of all) pictures whatever food we will have in the meeting. Point your phone camera to the QR code to join it.
